

Deficiency of the neurotransmitters serotonin and/or norepinephrine cause many diseases. In general these diseases fall into one of three categories:

1. Disease caused directly by deficiency
2. Disease associated with deficiency.
3. Secondary disease that is brought on by the primary disease.

LEGEND

- = neurotransmitter disease (primary)
- = associated disease
- = secondary disease

NEUROTRANSMITTER DEFICIENCY

Percentages = Number of patients starting weight management with the disease.
